

Precision medicine: NGS variant analysis and interpretation for translational research

Exercise 4: Running PanDrugs

Fátima Al-Shahrour ● Javier Perales ● Elena Piñeiro

September 28, 2016

Input

Search PanDrugs with the selected genes for patientCHP.

Check the results

- Which are the suggested therapies.
- Is there any drug suggested by a gene that is discarded by another?
- Is there any drug approved for the same cancer type?
- Is there any drug in cancer clinical trials?
- Could be used a drug repositioning approach?
